Clinical messaging and referrals

Apps provide improved security for a fully integrated and secured system.

£551,387 SAVING

There are an average of 700,000 referrals sent from Acute Trusts every month – around 4,605 per month per Acute Trust. Studies show that for a 600 bed hospital, a reduction of 43.45 per week of clinical time, at an average wage of £1,442 for a clinician, will save an average of 62,813.52 per annum. Improved data quality will lead to a reduction in clinical delays, as well as:

£	£	£	£
A reduction of admin tasks = £49,687	Improved clinical response = £11,356	Reduction of interruption = £52,344	Top line savings based on quantifiable data received = £113,387
